Reef Lava

Outdoor Fabric

Reef is a free-flowing design inspired by the interlocking bed of coral that typically exists around shallow tropical waters. In white and a rich rust tone, this design feels fresh and contemporary. The varying line thickness gives this print an organic feel which mimics natural patterns and shapes found in nature making it a perfect accompaniment to your outside space.

This fabric is part of our collection 'The Great Outdoors', it has a shower resistant finish which is anti-mould, anti-mildew and anti-microbial. Each fabric has been printed using EcoFast digital pigment printing methods, which use 50% less water than traditional print methods. As with most outdoor textiles, they prefer to be stored inside when they aren't being used, or during periods of wet, cold or damp weather.

This fabric can be FR treated to BS5852 Match Upholstery for indoor use.
